

MiZA Webinar

18th of January - 2 pm CET

***Diverting biowaste from disposal
and turning it into fertility -
A conversation with Enzo Favoino***
Enzo Favoino

The Moderator

Kaisa Karjalainen

MiZA Coordinator

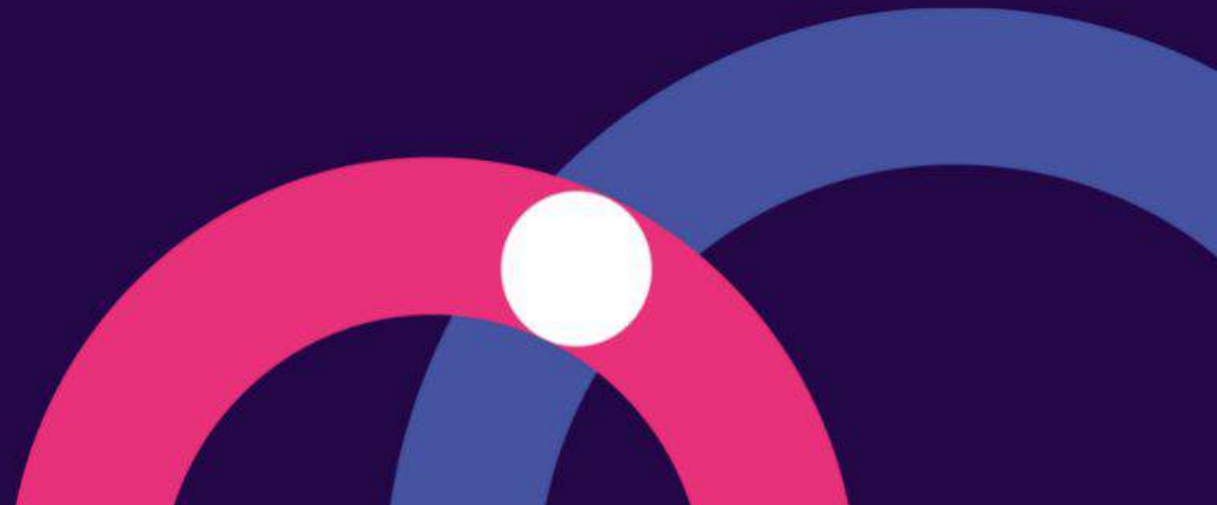

The Speaker

Enzo Favoino

Chair of Zero Waste Europe's Scientific
Committee

What is effective
organics management
and what are the
benefits?

What is Article 22 of
the Waste Framework
Directive all about?

Policy

written contract
company, or p
certain

What kind of collection options are there for organics and in which situations are they suitable?

Which treatment
methods should
different cities choose
for their organics?

**What are the
opportunities and
limitations for the use
of treated organic
waste?**

**Examples of smaller
and bigger cities who
have done it well?**

**What are some
effective ways to
maximize capture and
improve quality?**

**What are some
common myths or
misconceptions
around biowaste and
how to tackle them?**

How should
municipalities guide
citizens & businesses
who have “bio-
degradable” bags or
products?

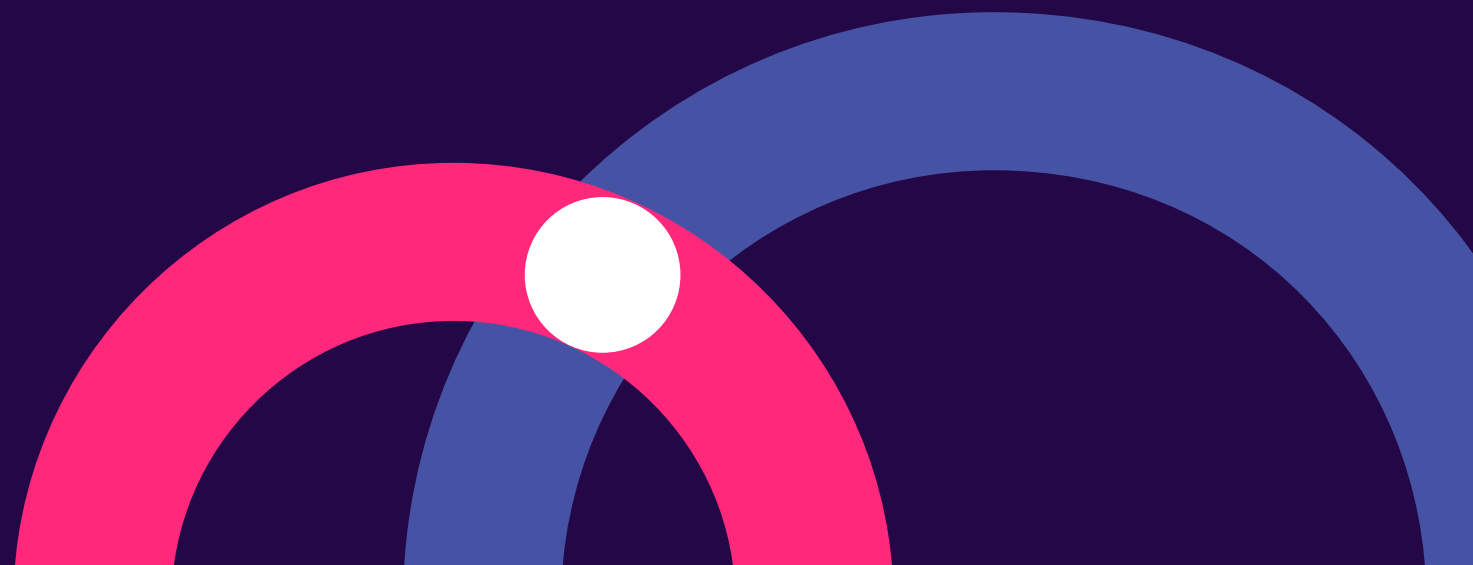

Do they go in the
organic, residual or
plastic waste bin?

Your 3 best tips for
cities to turn organic
waste into fertility?

Questions?
